PROFESSIONAL EXPERIENCE

Software Engineer — EPAM Systems

August 2025 – Present

Developed the Web Check-In and Seat Map pages for an airline company as part of a (3-2)-member frontend development team, enhancing user experience for seamless online check-in and intuitive seat selection.

- Developed and implemented new frontend features based on client requirements using React, TypeScript, Redux Saga, and Material UI, RHF .
- Resolved bugs in newly developed features and existing codebase to ensure functionality and performance.
- Actively participated in Scrum/ Scrumban ceremonies to provide updates and collaborate with cross-functional team members.
- Provided suggestions to enhance functionality / UI in the applications
- Patched vulnerabilities given by libraries and source code.
- Integrated RUM scripts and business events to track users actions
- Use AI to complete US's and multiple other activities (documenting , unit testing , etc)
- Provided ongoing support and maintenance for two core enterprise applications.

Technologies: React, JavaScript, TypeScript, Redux Saga, Material UI, CSS, SCSS, RHF

JavaScript Intern — EPAM Systems

May 2025 – August 2025 (4 months)

- Participated in a Front-End development course program, building a full course application integrated with a provided Back-End.
- Applied React, Tailwind CSS, Redux, React Toastify, and Zod/React Hook Form in practical project work.
- Collaborated with mentors for regular feedback, refining coding skills through practical tasks in a multicultural environment.
- Completed English proficiency and soft skills courses to enhance communication abilities.

JavaScript Intern — EPAM Systems

December 2023 – April 2024 (5 months)

- Completed front-end development training covering HTML, CSS, JavaScript, and React with Agile methodologies.
- Developed and maintained user interfaces ensuring cross-browser compatibility and optimized performance.
- Implemented reusable components and frameworks; conducted unit testing with Jest for quality assurance.
- Gained expertise in Git, Node.js, CSS preprocessors, AJAX, and browser optimization techniques.

EDUCATION

Software Development Engineering

Centro de Enseñanza Técnica Industrial (CETI) / 2021 – 2025

Diploma in Web Programming

Preparatoria 4 / 2018 – 2021

CERTIFICATIONS

Claude Certified Architect – Foundations. - https://www.credly.com/badges/051213db-6403-434d-9b9e-cadb6a961e1a/public_url

Anthropic | Valid: September 2026 – September 2027 | Status: Active, Authorized

TECHNICAL SKILLS

Front-End: React, Angular, Next.js, TypeScript, JavaScript, Redux, Redux Saga, Ionic, HTML, CSS, SCSS, Tailwind CSS, Material UI, Bootstrap, styled-components, CSS Preprocessors, Recharts , RHF

Back-End: Node.js, Java, PHP, Python, REST APIs

Databases: PostgreSQL, MySQL, Firebase / Firestore, Amazon DynamoDB, Neon, Redis

Cloud & DevOps: AWS (Lambda, DynamoDB, API Gateway), Docker, CI/CD, GitLab CI, Oracle VM, ESLint, Webpack

Testing: Jest, React Testing Library, MSW, Unit Testing

AI & Tools: Anthropic Claude, Claude API, Claude Code, Model Context Protocol (MCP), GitHub Copilot, Prompt Engineering, Gen AI Application Development

Version Control: Git, GitHub, GitLab

Methodologies: Agile / Scrum / Scrumban

SELECTED PROJECTS

VM Awards — Online Voting Platform

Next.js, React, Neon (PostgreSQL), NextAuth, TypeScript | [vm-awads-public.vercel.app](https://vm-awards-public.vercel.app)

- Built a custom voting platform with 15 categories and dynamic layouts adapting to up to 17 candidates per category.
- Implemented authentication via NextAuth (Google login, email verification with Nodemailer) and real-time results using Recharts.

Practice Application — React CI/CD Demo

React, Redux, Jest, RTL, MSW, Docker, GitLab CI/CD, Redis

- Achieved 80%+ test coverage using Jest, React Testing Library, and MSW for HTTP request interception.
- Implemented CI/CD pipeline with GitLab for automated testing, Docker image creation, and deployment on Oracle VM with Redis caching.

IoT Remote Servo Control — AWS-Powered IoT System

ESP32, MicroPython, AWS Lambda, DynamoDB, API Gateway

- Developed an IoT system with an ESP32 controlling a servo motor via real-time data from AWS services.
- Designed a scalable architecture using API Gateway, Lambda functions, and DynamoDB for remote motor control.

LANGUAGES

Spanish (Native) **English** (B2 – Upper Intermediate)
